

30 YEARS EUROFLEX

March 2023

EUROFLEX GmbH proudly celebrates its 30th company anniversary this year. This is an occasion to look back as well as forward. Our history is defined by numerous challenges mastered, countless exciting projects, and an extraordinary commitment to technical excellence and innovation.

**„The limits of the possible can only be defined
by going beyond them into the impossible.“**

(Arthur C. Clarke, British physicist and science fiction writer)

In the late 1970s a development team at G.RAU dared the impossible. For several years they worked intensively with an alloy known as Nitinol and performed numerous experiments. Finally in 1983, the first components were produced from this shape memory alloy. At that time, the applications for this new material were envisioned for the industrial sector. Yet early on, the medical technology industry also discovered the amazing superelastic properties of this special alloy.

The big breakthrough came in 1991 with the production of the first Nitinol tube at EUROFLEX's parent company G.RAU. The momentous decision to market Nitinol products quickly followed and in 1993 EUROFLEX GmbH was founded.

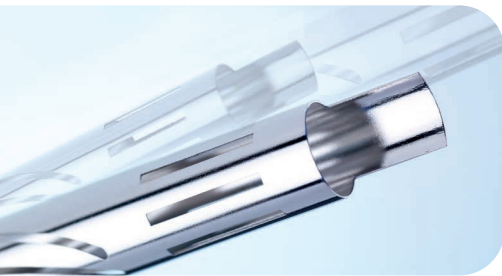

EUROFLEX began as a joint venture combining the experience of parent company G.RAU in the field of metal forming with the expertise of its US partner NDC, Nitinol Development Corporation, in the field of Nitinol alloys and their use in medical technology. This alliance of the two partners was a great success.

... 2

Today, EUROFLEX is a leading global supplier of high-precision tubes, wires, sheets, and components for medical technologies. In addition to Nitinol, EUROFLEX offers a variety of other materials for medical applications.

EUROFLEX is now a fully-owned subsidiary of G.RAU GmbH & CO. KG, part of the G.RAU Group with approximately 1800 employees worldwide.

Rapid sample production, dedicated customer service from prototype to serial production, highest quality products, and extensive analysis and investigation methods remain the core services of EUROFLEX.

Our slogan „WE CREATE SOLUTIONS“ is always in focus as we seize new opportunities with innovation and courage, pursue technically challenging paths, and challenge the limits of what is possible. At the same time, we hold the highest commitment to ensure and further develop the satisfaction of our customers.

**With this in mind, we would like to sincerely
thank you for your trust and partnership!**

Together with our dedicated and motivated team, we look forward to an exciting future with many new accomplishments.
