

NEW PRODUCTS FROM COSTA RICA / NITINOL HYPO-TUBES

For 25 years EUROFLEX has been a global leader in the supply of high quality semi-finished products for medical devices; especially in the production of Nitinol tubes for the peripheral and aortic stent markets. EUROFLEX is now expanding its activities in the Nitinol field by ramping up an autonomous production line for smaller diameter Nitinol hypo-tubes at its subsidiary - Rau Precision Metals S.A. in COSTA RICA. The production will be completely set up at the beginning of March 2018.

Size Range:

OD: 0,20 - 1,50 mm (0,0079 – 0,059")

Wall: 0,025 - 0,50 mm (0,001 – 0,020")

Length: up to 3m

Properties:

- ASTM certified material
- Generation 1, 2 and 3 Nitinol alloys available
- Surface oxide or ground
- ID oxide or "slurry cleaned"
- Burr-free ends
- Af-temperature max. 15 degree C
- Tensile properties per ASTM or per custom request
